Gorilla Audio always strive to give the customer the best end result possible, whatever that may be. This is partially achieved by our friendly, highly capable and experienced staff but also using, what we believe, is the best equipment we are able to offer. Our Audio systems are predominantly based around speakers from Void Acoustics, who we feel offer stunning ascetic design, Hi-fi quality audio at extreme volume and the best bass reproduction around. We also offer smaller Line Array and Live music speaker systems from Martin Audio who uphold similar reputations for sound quality. We proudly power these using the latest, state of the Art, X series Amplification from Powersoft. These feature extensive DSP built in, which can be remote controlled and monitored using there intuitive Armonia software. We currently have one of the largest stocks of Pioneer DJ Equipment, including the latest Nexus series in Cardiff. We are able to offer alternative and unusual staging and lighting solutions for DJs, parties and promotions, such as our DJ truck along with conventional LiteDeck, and trussing systems.

We have fantastic links with many other local and nationwide production companies, so can easily get hold of anything you may require even if it is not listed below.

*\* Prices are for a guide and are subject to change without notice, or at the discretion of Gorilla Audio.*

*\*Price listed is for one day. Weekend rate is 2x day rate, week rate is 3x day rate unless otherwise specified*

*\*Full terms and conditions available upon request*

**We are not VAT registered, so what you see is what you pay!**
